Cubic

Ground access hatch for cobblestone paving – Designed for elegant and durable surfaces

Operation & Maintenance

Safety checks before use

Before operating the unit, the following checks should be performed:

- Check that the area around the door is clear of obstacles.
- Ensure that no people or objects are in the path of the door during operation.

Cleaning the door and surfaces

To ensure long service life and proper functionality:

- The hatch should be opened and cleaned at least once per year.
- Clean with water and a mild detergent.
- Use a soft cloth or sponge – avoid harsh cleaning products that can scratch the surface.
- Dry the surface after cleaning to avoid limescale and corrosion.

Checking the spaces and hinges

- Ensure that the space between the door and the frame is free of particles.
- If the rubber gasket between the cover and the frame is damaged or dried out, it must be replaced.

Prevent Discoloration

- Wipe or rinse away substances that can affect stainless steel such as acids.
- Avoid contact with other metals.

Material-specific maintenance

- For care and maintenance instructions regarding the material installed in the hatch, please refer to the respective material supplier or distributor.

Always follow the specific operation and maintenance instructions included with your order. Instructions may vary depending on model, material, and selected options. This document provides general recommendations for the safe and correct operation and maintenance of the hatch.
